No. 71 of a Series . . .

TOMORROW'S HEADLINES?

If you picked up your paper tomorrow and read that disaster had wiped out the state of Kansas, killing 40,000 people, injuring everyone of the state's 1,905,299 population and causing a property and economic loss of about $4,000,000,000, it would be a national calamity.

But when that disaster comes day by day—killing hundreds, injuring thousands every day, year in and year out—the impact is lost because it didn't happen all in a sudden flash. That, however, is the annual toll of highway deaths and injuries and economic loss. 40,000 killed; 2,000,000 injured; cost $4,000,000,000—in a single year.

This greatest U. S. tragedy is caused mainly by reckless, speeding and drunken drivers, riding their super-powered cars over the nation's highways and byways. Clear skies and straight dry roads are the setting for three out of four fatal accidents. Week-ends and holidays are the times of greatest danger—highest casualty lists. *Saturday is the most dangerous day.* Drivers in an acoholic haze are a major factor in swelling the mounting death toll.

What can be done about it? Slow down! Thirteen states with speed limits of 50 miles or less had about 26 percent of the deaths and the rate declined 18 percent in one year. If that decline had been nationwide, nearly 12,000 lives would have been saved, 600,000 less injuries.

Slow down! *SLOW DOWN!* Keep *your* name off the casualty list.

SLOW DOWN—LIVES ARE IN YOUR HANDS!
